

Trampoline comparison

BERG Elite
 Ø 330, 380 and 430 cm.
 Also available as BERG Ultim Elite and Grand Elite.

Jumping comfort: ★★★★★
 Quality: ★★★★★

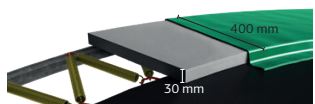

Warranty

Frame: 13 years*
 Protective edge: 5 years
 Jumping mat: 2 years
 Springs: 5 years

UV-resistant protective edge**

Protective edge***

AirFlow jumping mat

Less resistance while jumping, which is why you can make higher jumps.

TwinSpring Gold springs

Because these springs are placed at an angle, they are extra long and extremely flexible without reducing the jumping surface.

Frame:
Galvanised and black finish****

Safety Net Deluxe

- Arched construction for extra stability and safety
- Superior quality safety net
- Also available in XL version

* On registration at bergtoys.com/registration. ** The UV values mentioned are a BERG Classification. This is not an official UV factor. *** The dimensions of the Ultim and Grand trampolines differ. **** InGround trampolines have a zinc coating and no black finish.

BERG Champion
 Ø 270, 330, 380 and 430 cm.
 Also available as BERG Ultim Champion and Grand Champion.

 Perfect Jump Area TwinSpring Gold*

BERG **ULTIM** Trampoline

On a rectangular trampoline you can jump over the entire length. The jumps that you make on a rectangular trampoline are more controlled. That's why rectangular trampolines are used by top performers at the Olympic Games. The shape ensures that the trampoline fits perfectly in almost any garden.

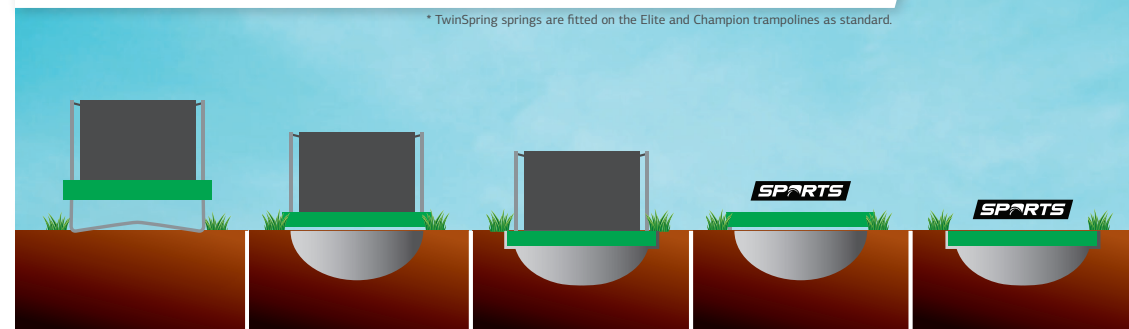

BERG **GRAND** Trampoline

The oval shape combines the efficient strength of a round frame with the large jumping surface of a rectangular trampoline. On an oval trampoline you can make some nice jumps over the entire length.

BERG Trampoline

The frame of a round trampoline is very strong. On a round trampoline you always jump towards the centre. The best jumps are made in the centre of a round trampoline. This is because the tension on the springs and the frame is equally divided when jumping.

* TwinSpring springs are fitted on the Elite and Champion trampolines as standard.

Regular + Safety Net

If you prefer not to dig a hole in your garden, a high trampoline is a good choice. A high trampoline is easy to install and move around. A high trampoline is also clearly visible in your garden.

InGround + Safety Net

A sunken trampoline with a safety net has a low threshold, making it easy and safe to step onto. The InGround trampoline is less visible in the garden than a high trampoline.

FlatGround + Safety Net

A FlatGround trampoline integrates seamlessly with your garden. This is because the protective edge of the trampoline is completely level with the garden. This ensures a very easy step-on. The Safety Net ensures that every user can jump safely.

InGround (Sports)

The sunken trampoline without safety net (sports) is nicely concealed in your garden. The low threshold of 20/27 centimetres makes the trampoline easy and safe to step onto.

FlatGround (Sports)

A FlatGround trampoline integrates seamlessly with your garden. This is because the protective edge of the trampoline is completely level with the garden. This makes the trampoline unobtrusive and very easy to step onto.
